Name :- Mohd. Rehan Mayal ; Class :- BCA-Sem-I-GI Date 5/9/26

Expt. No. _____ Page No. _____

Assignment-1 :- Introduction of HTML.

→ Webpages are written in HTML.
→ HTML :- Hyper Text Markup Language.

⇒ Hyper Text ⇒ Piece of text that works as a link.
⇒ Markup Lang ⇒ Way of writing layout info within Document.

→ When a browser opens an HTML file, it will look for HTML form in the text and use then to change layout, insert image and create links to other pages.
→ Since HTML Doc. are just text file they can be written in any text editor.
→ Popular choices is to use a special text editor mainly the one that puts focus on the visual result; rather than the course - Called WYSIWYG Editor (What you see is what you get).
→ Sum of Most Popular HTML Editors :- Front Page, Dream viewer, Notepad++, etc.-
- Will let you create pages more or less as you write doc in words.
→ It is forgiving ⇒ Quality associated with all the browser is that they could not give any error, if you have not put any HTML tag or attribute properly.
→ They will just ignore that tag or Attribute and will apply only correct tags and Att. before displaying the result.

→ Disadvantages of HTML :- ① Only Static & Plain webpages are made.
② Need to write a lot of code for simple webpages.
③ Security features are not good.
④ Complexity is produces when code is longe.

Expt. No. _____ Page No. _____

Assignment-2:- Advantage & Disadvantage of HTML.

→ Advantages:- ① Widely Used and supported by Every Browsers
② Easy to learn/Use.
③ By default installed in every windows OS, Don't need extra paid software.
④ It would not give any error.

→ Disadvantages:- ① Only Static & Plain Webpages are made.
② Need to write a lot of code for simple webpage.
③ Security features are not good.
④ Complexity is produced when code is long.
